Who are we?

"Quick Supplier" is a leading company in providing integrated solutions for the installation and maintenance of electronic devices and equipment. The company provides its services to various sectors such as industry, communications, and technology, with a focus on high quality and commitment to deadlines. Its services include the installation of control and monitoring systems, preventive maintenance and repair, in addition to continuous technical support. The company seeks to meet the needs of customers through a specialized team and long experience in the field, and provides customized solutions based on the latest technologies. It aims to strengthen its position in the local and regional market by focusing on innovation and efficiency.

QUICK SUPPLIER CO.

FOR INSTALLATION AND MAINTENANCE OF ELECTRONIC EQUIPMENT LIMITED LIABILITY

Our slogan

Our clients are our partners in continuous development.

Vision

To become a leader in the field of electronic equipment installation and maintenance services in the region by providing specialized and high-quality services that meet the diverse needs of customers.

Message

We are committed to providing professional services for the installation and maintenance of electronic equipment through a specialized team that seeks to achieve customer satisfaction. We work to provide innovative and effective solutions to ensure the continuity of our customers' businesses with high efficiency, with a focus on quality and commitment to deadlines.

Why us?

Experience and Efficiency: Our team has years of experience in the field of installation and maintenance of electronic equipment.

High Quality: We are keen to apply the best international standards in all stages of work.

Rapid Response: We provide continuous technical support to solve problems quickly and ensure the continuity of the systems.

Modern Technology: We use the latest tools and equipment to ensure advanced solutions.

Goals

Achieving customer satisfaction by providing services that meet and exceed their expectations.

Continuous innovation in providing new and up-to-date technical solutions.

Expanding the customer base to include new sectors in the local and regional market.

Achieving sustainability in business by adopting environmentally friendly strategies and reducing resource consumption.

Proposal for School Document Management Mobile Application

1. Introduction This proposal outlines the development of a mobile application for a school that will serve as a document management system. The application will provide a structured and secure platform for managing school documents, ensuring accessibility based on user roles and departmental affiliations.

2. Key Features

- **User Management:** Secure login and authentication system for different user roles including profiles.
- **Roles & Permissions:** Granular access control allowing different levels of access for administrators, teachers, staff, and students.
- **Departmental Access:** Users will only be able to view and manage documents relevant to their role.
- **Document Library:** A centralized repository for storing documents with organized categorization.
- **File Support & Download:** Users can upload, view, and download documents in PDF and Excel formats.
- **Mobile Accessibility:** Fully functional mobile interface optimized for ease of use on smartphones (both Android and IOS apps).

3. User Roles & Functionalities

- **Administrators:** Manage users, assign roles, oversee departments, and control document access.
- **Teachers & Staff:** Upload and manage documents and access department-specific files.
- **Students:** View and download documents but cannot upload them.

4. Security & Compliance The application will implement encryption and authentication measures to ensure document security and prevent unauthorized access.

5. Technology Stack

- Backend: Python
- Frontend: Flutter
- Database: MariaDB

6. Conclusion This mobile application will significantly enhance document accessibility and management within the school, streamlining operations and ensuring efficient collaboration among staff members and students.

Costs Proposal: App development including testing and go-live **USD 28,000**

Timeline: 6-8 weeks
